NOCTURN XS Camera is powered by the Lynx CMOS imaging sensor, optimized for low light level imaging.

The Lynx CMOS imaging sensor is the first operational sensor specifically designed with Night Vision, Homeland Security and Surveillance applications in mind.

This fully solid-state CMOS sensor provides excellent imaging across varying light conditions, from daylight to low-light levels - such as those found during a quarter-moon.

The Lynx CMOS imaging sensor provides full SXGA resolution at 100 frames per second, with < 4e- read-out noise and without cooling.
